ARCHITECTURAL WOVEN METALS

ENTANGLED BEAUTY

Beauty enhanced with functionality __

We develop woven metals. Sublime eye-catchers for use in architecture, interior design, stand construction and more. Beauty enhanced with functionality, such as solar control or fall protection.

Stunningly beautiful functionality __

Functionality and beauty are the joint top priorities at Twentinox. Our products are stunning whilst also providing protection from the sun or from falls on staircases or partitioning off part of a room.
